

RELAUNCH OF MOTORISED BOX BODY M.KO OPENSIDER

Efficiency and flexibility redefined

The M.KO OPENSIDER from Schmitz Cargobull offers an innovative solution for Nordic logistics, combining fully side-opening doors and ATP-FNA certification. It enables the transport of refrigerated and non-refrigerated goods at temperatures ranging from 0°C to +12°C. This vehicle optimizes the flow of goods between the industrial north and the commercial south, reducing empty return trips.

What makes the M.KO OPENSIDER special?

With its fully side-opening doors, versatile usage options and improved accessibility, the M.KO OPENSIDER offers an efficient, safe and flexible solution for the transport of refrigerated and non-refrigerated goods.

Advantages

Faster loading and unloading:

The side access allows for quick loading and unloading, especially in narrow or crowded areas.

Improved accessibility:

Side access to the load is ideal for urban environments or locations with limited rear access.

Time and work efficiency:

Shortens turnaround time at loading bays and reduces dependence on specific loading bay configurations.

Increased security:

Reduces the risk of injury by minimizing climbing into the truck.

Versatility in use:

The M.KO OPENSIDER can serve as a standard cargo transporter, mobile display, pop-up shop or event support vehicle.

Better use of space:

Allows easy organization and access to specific items without having to unload everything.

Higher residual value:

Vehicles with side openings achieve higher prices on the used market and are easier to find buyers.

Optimal load distribution:

Ensures even distribution of point loads for maximum efficiency.
