

The tipper semi-trailer S.KI LIGHT with volume version

Efficient and safe harvesting

Are you looking for a sophisticated solution for the agricultural sector?

With the tipper semi-trailer S.KI LIGHT volume version, agricultural products or other goods with a low bulk density can be transported cleanly and easily.

What makes the S.KI LIGHT the perfect solution for you?

The tipper semi-trailer S.KI LIGHT with offset chassis frame is easy to handle and guarantees maximum efficiency and reliability for smooth transport and optimised operating processes. By combining different lengths, heights and material thicknesses, you will find the solution that moves you forward.

Low loading and centre of gravity height. High driving stability.

The S.KI LIGHT impresses with its high level of comfort and robustness. The offset chassis frame reduces the loading height and centre of gravity by 160mm and, ensuring improved driving stability - especially when cornering. The lower centre of gravity provides additional stability during the tipping process.

Increased manoeuvrability due to low wheelbase.

Ideal tipper semi-trailer for the efficient transport of agricultural products in confined spaces such as narrow field tracks. Thanks to its voluminous equipment, it offers the largest possible loading space with maximum payload, ideal for goods with low bulk density.

Customised, tailor-made and suitable for your application.

The areas of application for the S.KI LIGHT are many and varied. Various configuration options allow the aluminium box body to be individually adapted to the intended use. All tipper semi-trailers have maximum loading volume, high payload and a reduced loading height.

Maximum payload,
easy handling, full
efficiency.

Quality is the top priority for all components
that we install in the S.KI LIGHT tipper semi-
trailer. Our aim is to ensure economical use
over a long service life.

The **curved roller curtain** is easy to handle and can be closed from the ground using the long centre tensioning strap. Emptying with the curtain closed using the swing function of the combi door saves time. The arched shape with stabilising central tube also prevents water from collecting

Safe and practical: the **height-adjustable working platform** with non-slip floor, access aid for the skip and parking position for the hydraulic hose

Partially lowered chassis neck area in the floor assembly of the body for a lower body loading height and a lower overall height.

The **offset in the neck area** of the chassis (stepframe) enables a reduced loading height.

Grain outlet hopper for grain pusher with practical parking position on the chassis or protected in the storage box.

Interior lighting for aluminium volume skips enables cleaning or handling with palletised freight even when the top is closed and ensures better illumination during night-time operation.

Unshakeable transport solutions – customised and well thought out.

As a strong partner for your success, we provide you with transport solutions and services that you can rely on, for greater cost-effectiveness, efficiency and transparency in your fleet and along the supply chain.

TrailerConnect® telematics provides you with real-time data for greater transparency and efficiency in your fleet and supply chain. With the **TrailerConnect® portal**, you can manage all your fleet's telematics data centrally – across all manufacturers – on one platform.

The optional **on-board weighing system** allows you to determine and document the payload at the loading point.

The TrailerConnect® **tyre pressure monitoring system with autolocation** assigns the integrated sensor to the correct tyre position in each case.

The sensor learns independently and records tyre pressure and tyre temperature data.

This means efficient fleet management, intelligent scheduling, increased trailer availability and effective processes.

Service contracts

Increase your uptime, create cost transparency and reduce your workload with **service contracts*** for trailers and tyres.

You can rely on:

The Schmitz Cargobull Premium services and the competent partner network.

- Customised financing and insurance from industry professionals
- Second Hand – First Class Used in tested quality
- TrailerConnect® telematic and digital services for smart logistics
- Spare parts that pay off, for repairs in line with the current value
- Full service for trailer, cooling unit and tyres
- Order Genuine Spare Parts online, delivery within 24h
- 1,400 Service Partners - your specialist workshop network
- 24h Cargobull Euroservice assistance across Europe
