

The dry freight semi-trailer S.BO PACE+

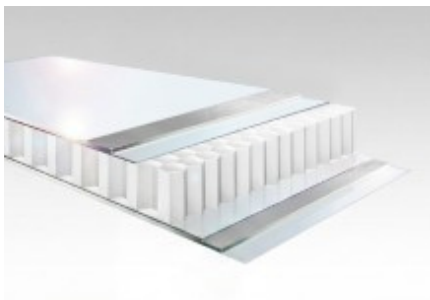

Greater efficiency in courier, express and parcel services (CEP)

With the S.BO PACE+, you can boost the efficiency of your transport processes. Its robust yet lightweight FERROSTRUKT® construction reduces the tare weight and is designed to withstand the stresses of daily use. Developed for dry freight and parcel logistics, it impresses with its durability, reliability and cost-effective operation.

Why is the S.BO PACE+ the perfect choice for you?

The S.BO PACE+ is tested in accordance with DIN EN 12642 Code XL and offers a wide range of options. It is available with 2 or 3 axles, a roller shutter or doors, a translucent or aluminium roof, and can be fitted with various load-securing systems.

Innovative FERROSTRUKT® technology for sustainable efficiency

FERROSTRUKT

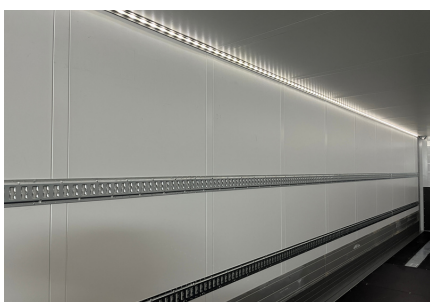

The FERROSTRUKT® sandwich construction combines robust steel outer layers with a lightweight polypropylene honeycomb core. This ensures high stability whilst reducing weight by up to 400kg compared to a traditional plywood dry freight semi-trailer. At the same time, the body retains its shape and remains durable even in damp conditions.

Maximum security for high-value goods

The optional TAPA* TSR-1 security package ensures greater security when transporting high-value goods. An electronic door locking system, an audible alarm system and door contact sensors provide reliable protection against unauthorised opening of the rear door.

* Transported Asset Protection Association

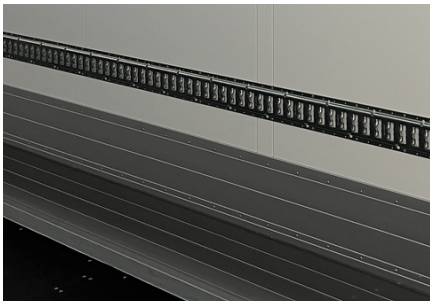

Sustainable panel construction for maximum uptime

The modular panel construction allows individual segments to be replaced, thereby reducing downtime and the need for workshop visits. At the same time, the structure is fully recyclable thanks to the combination of steel outer layers and a polypropylene honeycomb core.

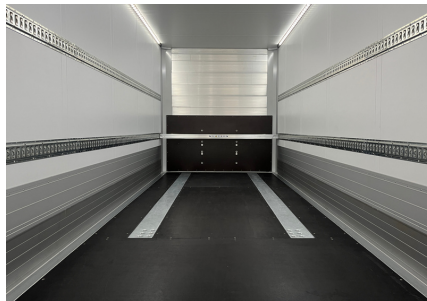

S.BO PACE+:

Fast, robust and always flexible.

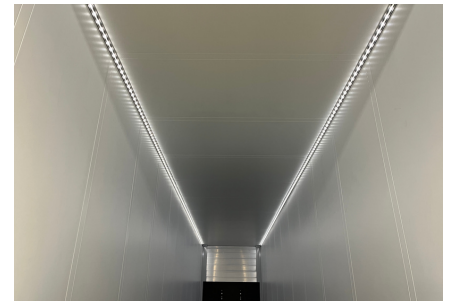

Reliability and innovation are the top priorities for all components in the dry freight semi-trailer S.BO PACE+. This ensures the vehicle has a long service life and retains its value.

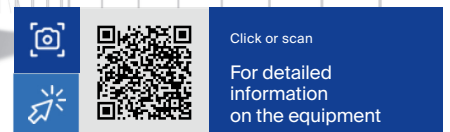

A 300mm high heavy-duty skid plate reliably protects the side panels during intensive use and speeds up loading and unloading processes.

Wooden floor: The standard floor load capacity is 5.5t. The vehicle is also available with an optional floor load capacity of 7.1t or 8.0t for transporting heavier loads or carrying industrial trucks.

Efficient roof design: The segmented roof construction facilitates repairs and minimises downtime. Continuous LED interior lighting improves visibility within the body and makes loading and unloading easier.

Galvanised chassis: Easy to maintain, with a 10-year warranty against perforation. Optionally available with **X-TOUGH chassis:** Up to 9.5t floor load capacity for particularly demanding applications.

Floor panels on the rear portal protect the rear floor panel from increased wear caused by frequent loading with a forklift truck and extend its service life.

Schmitz Cargobull axle with a 1,000,000 km or 6-year warranty (excluding wear parts).

Parcel, express and courier transport: tailor-made and well thought-out.

S.BO PACE+

With **TrailerConnect® telematics**, you receive real-time data for greater transparency and efficiency across your fleet and supply chain. In the TrailerConnect® portal, you can centrally manage all your fleet's telematics data – across all manufacturers – on a single platform.

With **Proactive Monitoring** for trailers, you can plan maintenance appointments in advance and ensure maximum uptime.

The **TrailerConnect® tyre pressure monitoring system with Autolearn** automatically detects newly fitted sensors, programmes them independently and records tyre pressure and temperature data.

As a strong partner committed to your success, we provide transport solutions and services you can rely on, delivering greater cost-effectiveness, efficiency and transparency across your fleet and throughout the supply chain.

This means efficient fleet management, intelligent scheduling, higher trailer availability and effective processes.

Service Contracts

Increase your uptime, achieve cost transparency and reduce your workload with service contracts* for trailers and tyres.
