

M.KI tipper with steel round body

# Top performance on difficult terrain

The robust round steel bodies offer an economical solution for tough everyday conditions and enable efficient transport of abrasive materials such as sand, gravel, asphalt and heavy demolition material, tailored to your application.

# Robust and flexible

Trucks with tipper bodies are more manoeuvrable on construction sites than tipper semi-trailers. Thanks to their manoeuvrability and off-road mobility, they are ideal for use in difficult terrain.

Low maintenance and high value retention

The quality of the body ensures a long service life and low maintenance requirements for reduced total operating costs. The wide range of equipment options increases efficiency in daily use.

Safety, durability and cost-effectiveness

The tipper truck bodies can be optimally combined with the selected trucks. The galvanised, torsion-resistant subframe allows the truck to be mounted on all common makes of truck, transforming the vehicle into a highly resilient, safe and efficient unit.

Protection and customisation

Attachments round off the comfortable use of the vehicle and make everyday transport easier. There are many extension options to choose from, such as deflector plates to protect the attachments and the valuable tractor unit from falling bulk material.

\* optional

# The right tipper for every application

Payload-optimised construction site tippers with volumes from 15m<sup>3</sup> to 22m<sup>3</sup> in 3 different lengths and 4 dropside heights. The different lengths and heights allow various cab and wheelbase combinations to be built by the truck manufacturers.

### Electric sliding roof

Easy and quick to operate from the cab. The convenient roll-top cover, operated from the ground, is also available.

### Interior swing flap

with a chute. A surface-mounted swing flap with all-round seal is also available as a variant.

### Hydraulic rear wall

As a surface-mounted rear wall flap, it is ideal for coarse bulk materials.

For detailed information on the equipment

### Optionally available

Fold-down, hinged underride protection for vehicles with a towbar.

### Extensive range of additional equipment

options, including side access ladder for loading control and brush and shovel holder.

The proven **thermal insulation**, as used in tipper trailers, is also available for the M.KI in selected height and length combinations.

# Tough day at the construction site? Make it easier.

We see ourselves as a provider of reliable and innovative transport solutions. That is why we offer services and digital solutions that provide even more support.

## Original spare parts - ordered online maintain the performance

Order your spare parts quickly, easily and cost-effectively from our online shop. They are usually delivered within 24 hours. The Europe-wide network of our service partners supports you in maintenance and repairs.

## Cargobull Euroservice gets you back on track fast

No matter where your driver is on the road, Cargobull Euroservice provides fast assistance around the clock, 365 days a year in 40 countries.

You can rely on:

## The Schmitz Cargobull Premium services and the competent partner network.

- Customised financing and insurance from industry professionals
- Second Hand – First Class Used in tested quality
- TrailerConnect® telematic and digital services for smart logistics
- Spare parts that pay off, for repairs in line with the current value
- Full service for trailer, cooling unit and tyres
- Order Genuine Spare Parts online, delivery within 24h
- 1,400 Service Partners - your specialist workshop network
- 24h Cargobull Euroservice assistance across Europe
