

The S.KI SOLID and S.KI LIGHT tipper trailers with full thermo-insulation

# The complete solution for asphalt transport

With the thermal insulation, you get the perfect transport solution for the increased requirements in road construction.

What makes the tipper with thermo-insulation the perfect solution?

The fully insulated aluminium box tipper with LIGHT chassis is the weight-optimised transport solution for road construction. Lightweight insulation installations and the lightweight construction made of Schmitz Cargobull aluminium system profiles enable a high payload.

Assistance systems that make work easier and safer

Assistance systems such as the paver brake, rear-view camera, tilt angle warning function and braking function when driving with a tipped skip increase work safety and reduce the risk of accidents.

High-quality, temperature-resistant cover

The rolling tarpaulin is a simple and cost-effective tipper body cover that protects the load, prevents the mix from cooling due to trapped heat and reduces air resistance. The optional sliding roof enables time-saving opening and closing by remote control.

Customised solutions

Thermo-insulated rear walls are available as required, either as an internal or external pendulum flap with asphalt slide. The external rear wall flap is suitable for partial unloading. In addition, the hydraulic rear wall flap is available for a rounded steel tipper.

# Payload-optimised for road construction

We also offer a robust transport solution for road construction that meets the increased demands of road construction. With the universally applicable and insulated rounded steel tipper body, you can reliably fulfil your various transport tasks.

**Low centre of gravity and optimal driving dynamics:** the rounded steel tipper body fits perfectly on the rubber mountings of the chassis. The wide, flat floor design of the aluminium box and rounded steel tipper bodies ensures a low centre of gravity and makes cleaning the tipper body easier.

The **working platform** is used to operate the roller cover and is equipped with an anti-slip floor, a trough-shaped entry aid and a parking position for the hydraulic hose.

Cladding of the rounded steel tipper body made of floating insulated panels – individual segments can be quickly replaced in the event of external damage.

equipment

The **ex-works calibrated on-board weighing system\*** is ready for use in five seconds and can be operated via the screen or beSmart app. There is no need to drive up to a stationary control scale, as the weighing data is available immediately.

The **foldable underride guard** offers high ground clearance and can be operated manually. It is optionally available with a spring mechanism for easy handling or in a pneumatic version for increased safety and time savings.

The **Schmitz Cargobull axle unit** consists of high-quality components that are perfectly matched to each other. With MRH air suspension (Multi-Ride-Height): Ideal for lowering the centre of gravity when unloading – even more robust, yet lighter.

\* optional

# Unshakeable transport solutions – customised and well thought out.

As a strong partner for your success, we provide you with transport solutions and services that you can rely on, for more profitability, efficiency and transparency in your fleet and along the supply chain.

With **TrailerConnect® telematics**, you receive real-time data for more transparency and efficiency in your fleet and the supply chain. In the **TrailerConnect® portal**, you can manage all of your fleet's telematics data on one platform – across all manufacturers.

The optional **on-board weighing system** can be used to determine and document the payload at the loading point.

The **TrailerConnect® tyre pressure monitoring system** with auto-location assigns the integrated sensor to the correct tyre position. The sensor learns independently and records tyre pressure and tyre temperature data.

This means efficient fleet management, intelligent disposition, higher trailer availability and effective processes.

## Service contracts

Increase your uptime, create cost transparency and reduce your workload with service contracts\* for trailers and tyres.

You can rely on:

## The Schmitz Cargobull Premium services and the competent partner network.

- Customised financing and insurance from industry professionals
- Second Hand – First Class Used in tested quality
- TrailerConnect® telematic and digital services for smart logistics
- Spare parts that pay off, for repairs in line with the current value
- Full service for trailer, cooling unit and tyres
- Order Genuine Spare Parts online, delivery within 24h
- 1,400 Service Partners - your specialist workshop network
- 24h Cargobull Euroservice assistance across Europe
