

Integrated management policy for our certified management systems

Our strategic decisions aim to safeguard our success over the long term and to expand our market position. We place particular focus on sustainability and consider our impact on the economy, the environment, and society.

We protect our employees

Provision of safe and healthy working conditions
Prevention of work-related injuries and illnesses
Elimination of hazards and minimisation of risks

We train our employees

Ongoing trainings, education courses and special training programs
Training skills for safety-conscious, environmentally friendly, energy efficient and quality-promoting work, while providing necessary information and resources

We involve our employees

Involvement in business decisions
Opportunity to actively participate in improvement processes in all areas
Inspiring our employees in an attractive, safe working environment

We work for our customers

Focus on the satisfaction of our customers and their end customers
Monitoring and safeguarding product and process quality

We encourage and challenge our suppliers

Involving our suppliers to achieve our ambitious quality goals
Striving for the procurement of sustainable and energy-efficient products and services

We manufacture high-quality products

Meeting requirements and pursuing the highest quality standards
Consideration of the entire product life cycle
Continuous improvement of our products and processes

We take our environment into account

Commitment to protecting people and the environment
Prevention of environmental pollution
Continuous improvement of our environmental and energy performance

We fulfil binding obligations

Compliance with legal and other obligations
Compliance with applicable laws, regulations, and standards

We take responsibility

Striving to minimize resource consumption and increase energy efficiency
Assessment of changes to prevent environmental impacts, energy inefficiency or hazards to employees in advance
Continuous review of our environmental and energy objectives
