The S.CF ALLROUND 20-45 container chassis

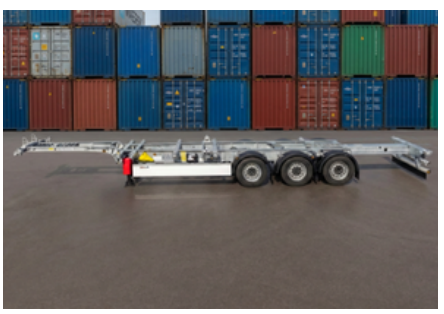
The reliable all-rounder for containers from 20’ to 45’

Are you looking for the best solution for your container transport needs?
The new generation of our S.CF ALLROUND 20-45 container chassis offers reliability every step of the way.

cargobull.com

Why is the S.CF ALLROUND the best solution for you?

The new container chassis combines optimum handling with a high level of safety. Practical design features and intuitive operation make the S.CF ALLROUND a compelling solution for day-to-day transport operations.



Maximum flexibility and safety

The S.CF ALLROUND container chassis is designed to accommodate containers from 20’ to 45’. Front and rear extension mechanisms allow for easy adjustment to the respective container sizes, thus offering maximum flexibility.

Easy handling meets an intuitive operating concept

The mechanical front extension and the pneumatic rear extension enable quick and convenient operation. In addition, intuitive user guidance with clear instructional videos displayed directly on the vehicle provides further support in day-to-day work.

The TrailerConnect® tyre pressure monitoring system with auto-location

The container chassis comes as standard with TrailerConnect® telematics and a tyre pressure monitoring system. This gives you a clear overview of all the vehicle’s information. Any deviations from the preset tyre pressure are automatically reported, helping to reduce wear and tear and fuel costs.

Flexible, safe, economical.

Quality is our top priority for all components. Our aim is maximum durability, which we achieve in the S.CF ALLROUND through features such as our galvanised chassis.

MULTI LOCK on the front beam with locking positions for tunnel containers with bevelled corners and for containers without a tunnel, featuring a positively guided plug-in lock.

Mechanical front-mounted extension for 45' containers fitted with spring-loaded roller bearings and designed for simple and safe handling.

For 2 x 20' loads, the height-adjustable **KLAPP LOCK** secures the front container in place.

For detailed information on the equipment

Control system for the pneumatic rear extension with manual locking.

New: **The rear extension** moves **pneumatically** to the selected locking position and brakes gently.

Newly designed the **rigid underrun protection** for 45' containers improves ergonomics and ease of use. The well-thought-out design ensures safe handling – with no loose parts whatsoever.

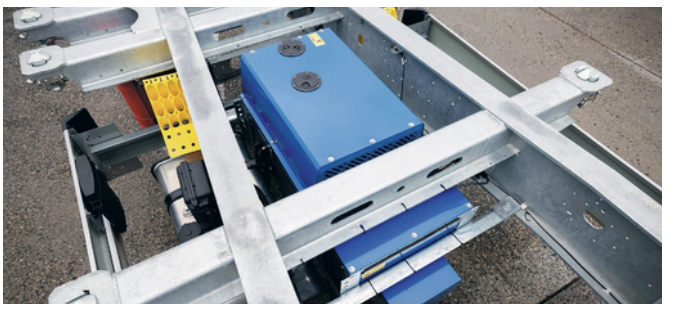
Intermodal transport, carefully designed for every application.

A wide range of equipment options and services ensure safe and seamless transport throughout the entire journey.

Generator set with approx. 30 cm ground clearance

For powering refrigerated containers

The semi-trailer chassis can be optionally fitted with a generator set that powers the transport refrigeration unit independently for several days, thereby ensuring temperature-controlled freight is delivered safely to the customer.



Service Contracts

Tailored to your container chassis

With the right service contract, you retain full control over costs and we ensure you always remain mobile. This allows you to focus entirely on your business.

You Can Rely on This:

Schmitz Cargobull Premium Services for Maximum Uptime

* All contracts can be extended with the Smart Service Package for digital services or with additional modules, such as “National Service”.
