

The tipper semi-trailer S.KI SOLID

The universal wear-resistant solution for the construction industry

Are you looking for a robust, unshakeable transport solution? The S.KI SOLID with steel round body is the universal tipper semi-trailer for building materials. Its high wear resistance makes it suitable for abrasive materials.

What makes the S.KI SOLID the perfect solution?

The tipper semi-trailer for demanding transport tasks on construction sites impresses with its unrivalled robustness, adaptability and durability. The weight-optimised body ensures a higher payload and increases cost-effectiveness.

The reliable answer to all construction site transport challenges.

The universally usable round steel body made of wear-resistant fine-grained steel requires little maintenance. Its intelligent design ensures high value stability. The flat, wider floor lowers the centre of gravity and improves driving stability. The running gear with Schmitz Cargobull axle is suitable for off-road use.

The flexible solution for all types of building materials and construction sites.

The areas of application for the S.KI SOLID are versatile, which means a high degree of flexibility when loading goods, thus preventing empty runs. Customised frames, individual floor and side wall combinations and a modular body system with application-specific rear wall variants are available.

Perfect service and customised solutions.

So that you can always be safe and confident on the road, we offer a chassis warranty of 500,000km or 3 years (wearing parts excluded) and a 10-year warranty against rust-through on the galvanised chassis.

More payload,
robust, simply
unshakeable.

Quality is the top priority for all components that we install in the S.KI tipper semi-trailer. Our aim is maximum durability and robustness as well as customisability for the right purpose.

The surface-mounted **swing flap** is suitable for partial unloading and is optionally available with a slide. Swing flaps with chute, combination doors or hydraulic rear wall flaps extend the range.

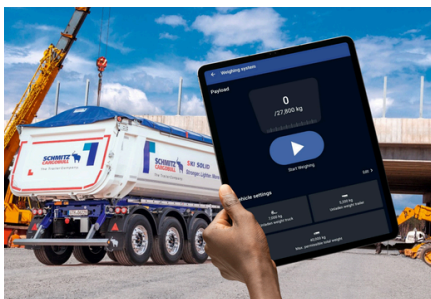

The **working platform** is used to operate the roller curtain and is equipped with a non-slip floor, body entry aid and parking position for the hydraulic hose

The **roller curtain** serves as a simple and cost-effective body cover against moisture and drifts and reduces air resistance. The optional sliding roof enables time-saving opening and closing by remote control.

For detailed information on equipment and technical data

The factory-calibrated **on-board weighing system*** is ready for use in 5 seconds and can be operated via the screen or beSmart app. A stationary checkweigher does not need to be approached, the weighing data is available immediately.

The **folding underide guard** offers high ground clearance for use on road pavers. It can be operated manually and is optionally available with a spring mechanism for easy handling or as a pneumatic version for increased safety and time savings.

The **Schmitz Cargobull axle units** consist of optimally harmonised, high-quality components. MRH air suspension (multi-ride-height): Ideal for lowering the centre of gravity when unloading – Even more robust, yet lighter

* optional

Unshakeable transport solutions – customised and well thought out.

As a strong partner for your success, we provide you with transport solutions and services that you can rely on, for greater cost-effectiveness, efficiency and transparency in your fleet and along the supply chain.

TrailerConnect® telematics provides you with real-time data for greater transparency and efficiency in your fleet and supply chain. In the TrailerConnect® portal, you can manage all your fleet's telematics data centrally – across all manufacturers – on one platform.

The optional **on-board weighing system** allows you to determine and document the payload at the loading point.

The **TrailerConnect® tyre pressure monitoring system** with autolocation assigns the integrated sensor to the correct tyre position in each case.

The sensor learns independently and records tyre pressure and tyre temperature data.

This means efficient fleet management, intelligent scheduling, higher trailer availability and effective processes.

Service contracts

Increase your uptime, create cost transparency and reduce your workload with **service contracts*** for trailers and tyres.

You can rely on:

The Schmitz Cargobull Premium services and the competent partner network.

An infographic with a dark background and a network of glowing blue lines. It features several circular icons with text descriptions of services:

- Customised financing and insurance from industry professionals (Euro symbol icon)
- Second Hand – First Class Used in tested quality (Trailer icon)
- TrailerConnect® telematic and digital services for smart logistics (Satellite icon)
- Spare parts that pay off, for repairs in line with the current value (Wrench icon)
- Full service for trailer, cooling unit and tyres (Trailer icon)
- Order Genuine Spare Parts online, delivery within 24h (24h icon)
- 1,400 Service Partners - your specialist workshop network (Wrench icon)
- 24h Cargobull Euroservice assistance across Europe (24h icon)

At the bottom right, there is a QR code with the text "Click or Scan" and "Find out more about our exclusive services here". Below the QR code, it says "Do you have any further questions for us? We are happy to advise you!" and provides the contact information: "T +49 (2558) 81-0" and "www.cargobull.com".
