

TrailerConnect® Telematics

Transparency and Efficiency Across Your Fleet

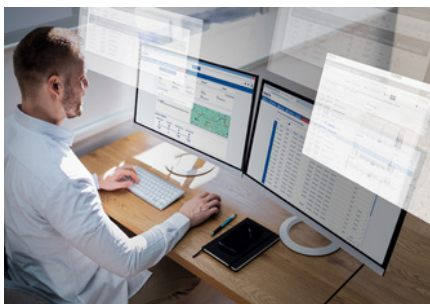

Transport operations generate valuable data every day. With TrailerConnect® Telematics, you can turn this data into greater transparency and efficiency throughout your fleet management activities. Via the TrailerConnect® portal and mobile applications, you gain a comprehensive overview of your entire fleet, regardless of manufacturer, enabling you to monitor, analyse and share information whenever required.

The image shows a large computer monitor displaying the TrailerConnect® Telematics software interface. The interface is divided into several sections: a top navigation bar, a main content area with a list of trailers, and a right-hand panel with a map and charts. The list of trailers includes columns for Date, Position, and Message. The map shows the location of the trailers. The charts display data over time. The background of the image is a blue sky with clouds and several white Schmitz Cargobull trailers parked in a lot. The TrailerConnect® logo is visible in the top left corner of the image.

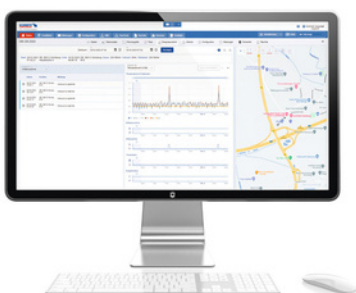

All telematics data
from leading
manufacturers in one
portal

Manage all your fleet's digital data centrally
in the TrailerConnect® portal, regardless of
manufacturer, on a single platform. This
enables efficient data management,
optimised workflows, and increased
availability and utilisation across your trailer
fleet.

Full transparency with real-time data and intelligent fleet monitoring

With TrailerConnect® Telematics, you gain reliable real-time data for greater transparency and efficiency across your fleet. Monitor your fleet at a glance, plan ahead, and respond proactively to changing conditions.

Increased uptime through proactive planning for trailers and cooling units

TrailerConnect® Telematics helps maximise trailer availability by providing early insights into key operating data and preventing unplanned downtime. Real-time fleet monitoring, alert functions, and timely notifications enable safer transport operations and rapid response to deviations.

Faster diagnostics and reduced workshop downtime

Guided fault diagnostics, access to error codes, and step-by-step repair instructions help ensure the trailer remains operational. Real-time data, over-the-air updates, and proactive maintenance alerts support predictive servicing and create transparent, efficient service processes across the entire fleet.

Reduce operating costs and increase efficiency

A consolidated view of all telematics data creates true transparency across the entire supply chain. Controlled data sharing with third parties enhances both security and efficiency in day-to-day transport operations.

Real-time fleet visibility with TrailerConnect® FleetTrack

Monitor the real-time location and availability of your trailers, regardless of the telematics hardware used. A clear and intuitive dashboard provides a comprehensive fleet overview, supported by automated reporting for greater operational transparency.

Central integration of multiple systems via the TrailerConnect® Data Management Center

Consolidate telematics systems and data from multiple sources on a single platform. Secure and controlled data sharing gives you maximum transparency and full control over your fleet information.

Track transport operations and share data with TrailerConnect® TourTrack

Track tours and transport operations with precision while sharing selected data for each individual transport order. Tour-based real-time monitoring, including estimated arrival times and automated, order-specific temperature reports, ensures greater visibility throughout the transport process.

Real-time monitoring of cooling units and trailers with TrailerConnect® FleetWatch

With TrailerConnect® FleetWatch, you always have full visibility of your fleet's condition and maintenance requirements. Detect maintenance needs early, prevent cargo damage and reduce costly downtime. Proactive monitoring enables potential issues to be identified at an early stage and provides clear recommendations for action.

Complete transparency on fleet utilisation and performance

The utilisation analysis in TrailerConnect® FleetWatch delivers precise insights into the usage and performance of your fleet. Evaluations by vehicle, group or component, combined with key metrics such as utilisation rates, operating hours and temperature profiles, reveal optimisation opportunities and help improve operational efficiency.

Manage service contracts with MyCargobull

Achieve maximum transparency and efficient fleet management with centrally organised contract, vehicle and service data that is accessible anytime. Automatic maintenance reminders, clear service histories and intuitive navigation support predictive planning and enable efficient day-to-day fleet operations.

TrailerConnect®

- stay informed in the office and on the road

The mobile applications for drivers and fleet managers provide digital access to all relevant telematics data, ensuring that key information is always available whenever and wherever it is needed.

beUpToDate App

For Dispatchers and Fleet Managers

With the beUpToDate app, fleet managers and dispatchers have their fleet at their fingertips at all times. Location, idle time and movement data are displayed directly on the smartphone. Alerts and notifications are delivered instantly, enabling rapid response and informed decision-making.

beSmart App

For Drivers

The beSmart app provides drivers with continuous visibility of trailer status, enabling them to respond quickly when action is required. Various trailer functions can be controlled directly via the app, while push notifications keep drivers informed about important events in real time.
